# REST API, UN COMMODITY

**Usemos los métodos HTTP!**

---

## PETICIONES QUE NO SON RESTFUL

- ▶ GET api/getUsers
- ▶ GET api/user/10?new\_name=jhon
- ▶ POST api/user/10/new
- ▶ POST api/user/20/delete

# RESPUESTAS QUE NO SON CORRECTAS

## ► GET api/user/10

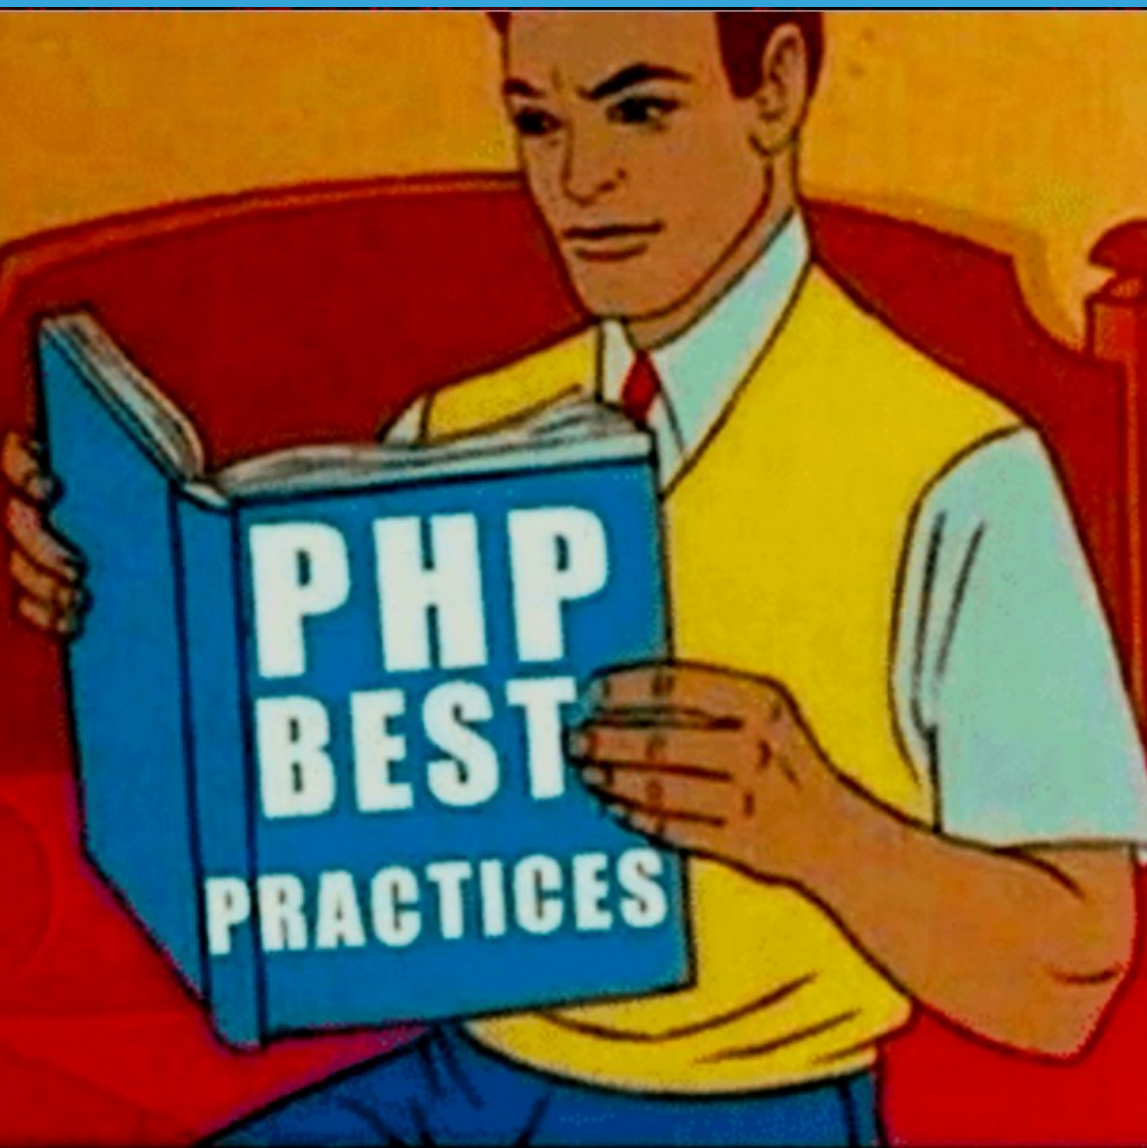

```
new Response([
  'success' => false,
  'error' => 'The user 10 was not found',
], 200);
```

## ► GET api/post?tag=nature

```
{
  "posts":{
    "101": {"title": "Title 101", "description": "Description"},
    "245": {"title": "Title 245", "description": "Description"},
    "33": {"title": "Title 33", "description": "Description"}
  }
}
```

# RESTUL API

Description	Endpoint	Response ok	Response nok
Crear un nuevo post	POST <code>api/post</code>	HTTP 200/201	<ul style="list-style-type: none"><li>- HTTP 400 Invalid request</li><li>- HTTP 401 Not authorized</li><li>- HTTP 403 The account is not allowed to create posts</li></ul>
Editar un post	PATCH <code>api/post/{id}</code>	HTTP 200/202	<ul style="list-style-type: none"><li>- HTTP 400 Invalid request</li><li>- HTTP 401 Not authorized</li><li>- HTTP 404 Post not found for id {id}</li></ul>
Eliminar un post	DELETE <code>api/post/{id}</code>	HTTP 200/204	<ul style="list-style-type: none"><li>- HTTP 401 Not authorized</li><li>- HTTP 404 Post not found for id {id}</li></ul>
Listar post(s)	GET <code>api/post{/id}</code>	HTTP 200	<ul style="list-style-type: none"><li>- HTTP 401 Not authorized</li></ul>

        RequestInterface $request,
        ResponseInterface $response,
        callable $next = null) : ResponseInterface;
}
```

---

## LO BUENO DE USAR UN PSR

- ▶ Puedes cambiar una librería por otra fácilmente
- ▶ Al seguir un estándar, los issues de implementación son están bien documentados.
- ▶ Te obligas a codificar para interfaces en vez de clases concretas.
